Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-10, drawn to an ink containing a suspension of carbon nanotubes.

Group II, claims 11-18, drawn to substrate that is in contact with a dried carbon nanotube containing ink

Group III, claims 19-30, drawn to a method of applying an ink containing a suspension of carbon nanotubes to a substrate.

Group IV, claims 31-40, drawn to a method of irradiating and detecting luminescence from a composition comprising a plurality of carbon nanotubes in contact with a substrate.

Group V, claims 41-61, drawn to a method of forming an optically tagged article.

Group VI, claims 62-75, drawn to a method of detecting luminescence from an optically tagged article.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

All the groups lack the same or corresponding special technical features. The special technical feature linking groups I-III, which is an ink containing a suspension of carbon nanotubes, is not found in Groups IV-VI.

The special technical feature linking groups I-III, which is an ink containing a suspension of carbon nanotubes, is obvious or anticipated by U.S. patent 6,330,939. Accordingly, the special technical feature linking the groups does not provide a contribution over the prior art and no single general inventive concept exists.

The claims lack a unity of invention for these reasons and therefore restriction is appropriate.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
